Technical Skills

💻 Programming:

Python, Java, TypeScript / JavaScript, SQL

⚙️ Engineering practice:

Clean code, Code review, Performance & maintainability focus, Testing, Git, CI/CD basics, Linux, Docker

🌐Web:

React, Next, Node, REST APIs, HTML/CSS, Tailwind CSS

📊Computer Science:

Data structures
Data processing
Data pipelines
Modular application design
Algorithms
Complexity analysis
System design basics
Object-oriented design
Object-Oriented Programming

🌍 Languages:

French (Native)
English (Fluent)

Soft skills

✔ Comfortable working in structured organizations

✔ Strong problem-solving mindset

✔ Curiosity & fast learning

✔ Clear communication

✔ Team-oriented in Agile environments

✔ Adaptable to new domains

✔ Analytical thinker

Summary

Master's graduate in Computer Science with strong foundations in AI, Big-data, backend development, and data systems. Experienced in building end-to-end applications and designing structured pipelines. Analytical, adaptable, and eager to contribute to high-performance engineering teams in complex environments.

Education

MSc Pro Master's Degree, Software Architect & Application Developer, AI and Big-Data specialization (2023-2025) - *Epitech Technologie, Marseille*

Bachelor's Degree in Mathematics and Computer Sciences Applied to Social Science (s (2020-2023) - *Faculty of Economics and Management, Aix-en-Provence*

Work experience

IT DEVELOPMENT TECHNICIAN (APPRENTICESHIP) - *Micado (Sisteron)*

📅 February 2024 - July 2025

Development, redesign, deployment, maintenance of internal and external applications

Design, creation, and management of application databases

Optimized numerical engineering workflows by leveraging Sparse AI and Python modules, reducing computation time from several hours to just a few seconds

Integration of AI and Sparse AI methods into the company's competency framework

Automation of software installation, download, and launch processes

Software Engineering works

MULTI-SKILLED EMPLOYEE - *Mcdonald's (Sisteron)*

📅 December 2023 - January 2024 / July 2023 / March - August, 2021

Preparing and service of customer's order efficiently

Cleaning and maintaining kitchen equipment and workspace

Projects

Customer Churn Prediction Pipeline

Developed an end-to-end customer churn prediction pipeline, including data preprocessing, feature engineering, model training, visualization and evaluation.

Technologies: Python, Scikit-learn, Pandas, Matplotlib, PyTorch

SoundTools GPT – Web & AI Developer

An AI-powered web app for generating custom music samples and presets; AI models, chat integration, and front-end development in a Scrum environment.

Technologies: Python, Flask, Java Springboot, Angular, TypeScript, Bert NLP, GitHub
